Ayan Bhardwaj

(945) 527-6698 | ayan.bhardwaj@utexas.edu | linkedin.com/in/ayan-bhardwaj-579048281 | github.com/AyanBhardwaj1

EDUCATION

The University of Texas at Austin **Austin, TX**
B.S. Computer Science Honors & B.B.A. Canfield Business Honors (CSB Honors Program) *May 2029*
- GPA: **4.0/4.0** | Relevant Coursework: Data Structures (Honors), Discrete Math (Honors), Probability & Statistics, Multivariable Calculus

TECHNICAL SKILLS

Languages: Python, C++, Java, TypeScript, JavaScript, Rust, SQL, MATLAB, HTML/CSS
ML & Data: PyTorch, PyTorch Geometric, NumPy, scikit-learn, OpenCV, BeautifulSoup, Scrapy, Selenium, yFinance
Frameworks & Tools: React, Next.js, FastAPI, Tauri, PostgreSQL, Supabase, Modal, Vercel, REST APIs, Git/GitHub

EXPERIENCE

Moss (YC F25) **Remote / San Francisco, CA**
Software Engineering Intern *May 2026 – Aug 2026*
- Built and shipped **10** open-source apps in TypeScript and Rust on Moss's WebAssembly semantic search SDK (mossJARVIS, Mycelium, Sentry, Thread, StudyOverlay) with sub-10ms on-device retrieval, earning **39** GitHub stars.
- Drove **100+** GitHub stars to the core usemoss/moss repo through technical posts on SDK performance (**5,000+** views), and merged **3** pull requests into the production SDK.
- Designed the OpenRouter LLM integration layer reused across all **10** builds and adopted by **5** fellow interns.

Koyal AI (YC F25) **Remote**
AI Engineering and CRM Intern *May 2025 – Sept 2025*
- Built OpenCV scene classification across **300+** video scenes, cutting manual review time by **70%**, and integrated an emotion classifier mapping 48 emotions to 6 core categories (**95%** lip-sync accuracy).
- Worked on a production face-swap pipeline with retries and multi-tier fallbacks across **1,000+** images (**90%** accuracy gain).
- Grew a **500+** person waitlist as one of the first interns, running outreach to industry professionals alongside the founders.

UNT Lab of Natural Language Processing **Denton, TX**
Research Assistant *Jan 2025 – Sept 2025*
- Built a Python scraping pipeline (BeautifulSoup, Scrapy, Selenium) that collected and cleaned **5,000+** Russian, Belarusian, and Ukrainian news articles for LLM-based media-bias analysis in the Lab 42 AI group.
- Wrote multilingual data-cleaning and prompt-generation scripts in Python for BelarusianQA, a low-resource question-answering benchmark, cutting manual annotation effort by **80%+**.
- Applied LLMs to compare coverage across the three languages, producing labeled datasets for low-resource language modeling.

PROJECTS

YouBank | Next.js, TypeScript, Python, PyTorch, Modal, PostgreSQL, Rust **github.com/AyanBhardwaj1/YouBank**
- Building an AI research platform for finance professionals: a keyboard-driven terminal with **35+** functions and **328** tools on SEC EDGAR/XBRL data, an email agent, and a live modeling studio with an Excel add-in.
- Implemented quantitative models in TypeScript from scratch, including GARCH volatility, VaR with backtests, Monte Carlo valuation, a Treasury yield curve, and Altman, Ohlson, and Merton credit risk.
- Deployed PyTorch services on Modal, including a GraphSAGE model for M&A link prediction and hybrid retrieval with cross-encoder reranking that raised recall@5 from **0.85** to **0.97**.
- Gated email autopilot on a Bayesian bound learned from user edits (**90%+** of drafts unedited); **1,000+** unit tests.

Mycelium | TypeScript, Chrome Extension API, Moss SDK **github.com/AyanBhardwaj1/Mycelium**
- Built a Manifest V3 Chrome extension in TypeScript that captures visited pages and notes into a semantically indexed knowledge base.
- Used the Moss SDK for real-time vector indexing, enabling sub-10ms similarity search and topic clustering of captured pages.

LEADERSHIP & AWARDS

Advanced Equities Organization **Dallas, TX**
Founder *Aug 2024 – Mar 2026*
- Founded a 501(c) financial literacy nonprofit and grew it to **200+** members; managed a **$15,000** live investment portfolio and ran a stock pitch competition where **300+** interns submitted **100+** reports.

Y Combinator Startup School 2026: Technical builder cohort, selected from 30,000+ applicants ($25,000 in API credits)
Federal Reserve Bank of New York: Fed Challenge Winner, Economics Publication
Organizations: Texas Accelerate, Directed Reading Program (DiRP), CS and Business Association (CSBA), Honors Business Association (HBA)
Interests: NBA (Dallas Mavericks), soccer, pickleball, jersey collecting | Languages: English, Hindi (fluent)
